Dear Friends and Colleagues,

The Department of Dermatology & Cutaneous Surgery is celebrating its 50th year of excellence! Dr. Harvey Blank founded the Department in 1956 and the residency program in 1957. Over the past 50 years we have become one of the most respected and dynamic programs in the country and take great pride in filling our educational, research, clinical, and community service missions with excellence.

We invite you to celebrate our past and current accomplishments, as well as look to the future during four days of CME educational and social activities at our 50th Anniversary Celebration, March 22nd-25th, 2007. We are particularly excited about the William H. Eaglstein Wound Healing Festschrift to be held on Saturday, March 24th.

This will be a wonderful time to reconnect with old friends, celebrate Miami and our Department, and enjoy a terrific dermatology program, featuring many of our distinguished graduates, past and present faculty and fellows, and special friends.

I look forward to celebrating with each and every one of you in March!

Sincerely,

Larry

Accreditation:
This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of EXCEL Continuing Education and The University of Miami Department of Dermatology and Cutaneous Surgery. EXCEL Continuing Education is accredited by the ACCME to provide continuing medical education for physicians.

Credit Designation:
EXCEL Continuing Education designates this educational activity for a maximum of 15.5 AMA Physician’s Recognition Award Category 1 Credits. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Compliance with Updated ACCME Standards for Commercial Support:
All conflicts of interest of any individual(s) in a position to control the content of this CME Activity will be identified and resolved prior to this educational activity being provided. Disclosure about provider and faculty relationships – or the lack thereof – will be provided to the learners.

Educational Objectives:
Upon completion of this conference, participants should have increased diagnostic acumen of cutaneous disease, as well as state-of-the-art therapeutic knowledge of dermatological disease, to demonstrate how translational basic science research will impact patients in the very near future, and to have the opportunity to access a life-long learning experience through an academic department of dermatology and cutaneous surgery.

Target Audience:
This event was designed to meet the educational needs of dermatologists and other healthcare providers interested in acquiring additional knowledge concerning dermatologic disorders and treatments.
