Medical Center Dial-Up
- Windows 2000 Instructions

Create a Connection

1. From your computer desktop, go to Start, Programs, Accessories, Communications and click on Network and Dial-Up Connections.

![Network and Dial-Up Connections folder]

2. When the "Network and Dial-up Connections" folder opens up, double click on the "Make New Connection" icon.

![Make New Connection]

3. At the Nework Connection Wizard, click on Dial-up to the Internet.
Network Connection Wizard

Network Connection Type
You can choose the type of network connection you want to create, based on your network configuration and your networking needs.

- **Dial-up to private network**
  Connect using my phone line (modem or ISDN).

- **Dial-up to the Internet**
  Connect to the Internet using my phone line (modem or ISDN).

- **Connect to a private network through the Internet**
  Create a Virtual Private Network (VPN) connection or tunnel through the Internet.

- **Accept incoming connections**
  Let other computers connect to mine by phone line, the Internet, or direct cable.

- **Connect directly to another computer**
  Connect using my serial, parallel, or infrared port.

---

4. Select I want to set up my Internet connection manually, or I want to connect through a local area network (LAN).

---

5. Choose the option I connect through a phone line and a modem.
6. Enter the phone number for the Medical Center's dial-up server
   Area Code: 305  Telephone number: 243-1039.
7. Under connection name, type Medical Center Dial-Up.

8. To create a shortcut on the desktop right click on the new connection and click on Create Shortcut. You’ll get a message asking to create the shortcut on your desktop. Click Yes.
9. From the **Connect Medical Center Dial-Up** window, click on the Properties button.
10. Go to Options tab and check the options to Include Windows logon domain and Prompt for phone number.

11. Enter MEDICAL as the Logon domain.
12. Click on the Dial button to connect (305-243-1039).
